

## **Installation of Emerald Ash Borer (EAB) Traps!**

Foresters from Bio-Forest of Ontario Canada recently helped install 10 Emerald Ash Borer (EAB) traps around Sutton. These bright green triangular traps will be monitored for EAB to help assess the prevalence of EAB in Sutton. Emerald Ash Borer is one of several factors that have precipitated the decline of ash trees in our area. Thanks goes to the Town of Millbury for donating the traps to Sutton noting the larger presence of ash trees in our community.
